SUMMARY

Curious AI integration specialist with 7+ years experience delivering reporting, dashboards, and data pipeline solutions across financial markets and higher education. Instrumental in scaling an international fintech startup from early stage to profitability by developing self-sustaining infrastructures that held up at operational scale. Strong interest in leveraging automation expertise to design *people-centric* and *cost-efficient* solutions.

SKILLS

Technical Skills: Python, SQL, R, Excel, Power BI, Tableau, Data Studio, Anvil, Streamlit, Jupyter Notebook, Visual Studio Code.

Additional Skills: Agentic AI, LLM's, Prompt Engineering, API Integration, Model Optimization, A/B Testing

EXPERIENCE

Cambrian College (Sudbury, ON)

Database Analyst

Sep 2025 – Apr 2026

- Reduced manual data processing by 40% by integrating Power BI with the student database, tracking 20+ operational metrics.
- Improved downstream decision accuracy by 25% by engineering data pipelines (SQL, ETL processes, Excel) to extract, validate, and analyse operational data, proactively resolving critical data-quality anomalies.
- Improved vertical escalation during high-traffic periods by 50%, by mapping user flows to optimise a QLess queue routing system.
- Eliminated manual lookups by developing a Microsoft Teams chatbot that provided instant access to 50+ knowledge articles.
- Received management commendation for automating workflows during a 60% staffing reduction caused by strike action, saving 10 hours of manual compilation weekly and maintaining operational continuity for the available team.

Herbert Insights & Innovations (Remote | Shepherdstown, WV)

Business Intelligence Consultant

Jan 2026 – Mar 2026

- Accelerated market expansion planning to isolate California and Maryland as prime target territories, by building a Census-to-Data Studio ETL pipeline to track and rank territories by permit issuances and regulation levels.
- Engineered a new regulatory compliance feature that evaluated hypothetical project plans in under 2 minutes, by building an AI-powered Streamlit tool integrating OpenAI to parse CALGreen requirements.

KiaKia Finance (Lagos, NG | London, UK)

Product Manager & Business Intelligence Lead

Jan 2018 – May 2025

- Grew revenue by 25% by conceptualizing and marketing the KiaKia Invest initiative, using k-means clustering and Power BI to pinpoint high-value customers and maintain targeted client relationships.
- Cut executive decision-making latency by 50% by building and maintaining the central repository tool/data warehouse on BigQuery, providing stakeholders with real-time performance trends.
- Redesigned transactional pricing workflows to eliminate pricing leakage on low-volume accounts by 30%, by developing a financial model that applied volume-based benchmarks.
- Maintained an average transaction fulfilment time of under 15 minutes for our digital vertical while leading a team of 3 operations and finance staff overseeing the transfer workflows.
- Secured key growth partnerships that grew profits by 50% by leading client presentations, translating transactional flows into clear, data-driven narratives alongside a junior team member.
- Reduced onboarding time by 25%, by documenting workflows and leading training sessions on Python, SQL, and advanced Excel.

PROJECTS

WordBudz

Apr 2026 – Present

Independently architected and shipped a voice-based conversational AI platform, engineering a real-time LLM scoring pipeline with structured JSON schema extraction and HuggingFace API integration. Built a Stripe-powered CRM microservice to automate merchandise fulfilment workflows, demonstrating end-to-end ownership across the full AI application stack.

EDUCATION

Postgraduate Diploma, Business Analytics. Cambrian College, Sudbury, ON

Data Science Certification. LeWagon. London, UK

Master of Arts, Public & International Affairs. University of Pittsburgh, Pittsburgh, PA

Bachelor of Arts, International Relations. Lincoln University, Oxford, PA
